

AI Booking Engine

Detailed overview of the implementation process

Our team will fully configure AI Booking Engine for you: from setting up rooms and pricing to payment integration and installing the booking engine on your website.

[Product website](#)

Comprehensive Setup

We handle it for you

Typically completed within **3 weeks**

- ✓ **Full configuration of room types** (restrictions, min/max number of people, equipment, photos, descriptions)
- ✓ **Full configuration of rate plans** (creation of specific rate plans, setting restrictions, setting inheritance, configuration of prices per fewer person / per more person, completion of descriptions and photos)
- ✓ **Creation of payment and cancellation policies** and assigning them to rate plans
- ✓ **Full configuration of email inbox and message templates** (creation of message templates for each required type of confirmation, **translation of templates** into languages available on your website)
- ✓ **Verification of the payment gateway and its connection**
- ✓ **Configuration of discounts**, discount codes and assistance in setting AI discounts
- ✓ **Adding regulations** of your hotel
- ✓ **Automatic translation of descriptions** for rate plans and rooms
- ✓ **Discussion of the engine operation**, confirmation of configuration and verification of correctness of your website
- 🛠 **Implementation of the engine on the website** by our programmer
- ⚙ **Handover of instructions** for operating the booking engine

Estimated implementation time

up to 3 weeks

Do you list your property on Booking.com? That's great!

We can import a wide range of information directly from your account!
Thanks to this, the implementation process will be much faster.

- ✓ We will import your photos
- ✓ We will import room amenities
- ✓ We will create sample room descriptions

We handle the entire system logic for you

Our team fully configures the key elements of your offer

Rooms

We'll set up restrictions, minimum and maximum occupancy, room amenities, photos and descriptions.

Rate plans

We'll create your rate plans, define restrictions, set inheritance rules, configure pricing per person (including extra guests), and complete descriptions and photos.

Property policies

We'll prepare payment and cancellation policies and assign them to the appropriate rate plans.

We also take care of all technical aspects

Email communication

We fully configure your email setup and message templates. We create templates for every type of confirmation and translate them into multiple languages.

Terms and policies

We add your terms and conditions, privacy policy and marketing consents.

Payments

We verify your payment gateway settings and connect it to the AI Booking Engine.

Translations

We automatically translate your room and rate plan descriptions. Just provide the English version and we take care of the rest.

Intelligent price management

We help you leverage the power of AI to maximize your revenue.

Learn how to set up discounts and promo codes

We help you configure AI-driven discounts

What we need to get you started

To ensure a smooth AI Booking Engine setup, we'll need some information about your property (unless we can import it directly from Booking.com).

Room information

- Room type names (e.g., Standard Room, Deluxe Apartment)
- Room size and number of bedrooms
- Maximum, default, and minimum occupancy
- List of amenities (e.g., air conditioning, balcony, towels)
- Room descriptions
- High-quality photos

Rate plans

- Plan names (e.g., Non-refundable, Flexible)
- Which rooms are available under each plan
- Minimum and maximum length of stay
- Base prices and adjustments for number of guests
- Seasonality (if it affects pricing)
- Plan descriptions
- Photos

Payment and cancellation policies

- Do you offer non-refundable bookings?
- How many days before arrival do you charge a deposit?
- What is the deposit amount?

Email templates

- Property name and contact details
- Optional welcome messages or custom texts

What we need to get you started

Property description

- A short description of your property
- Photo gallery (exterior, reception, wellness area, restaurant, etc.)
- Additional details: policies for children and pets, check-in/out times, parking, etc.

Discounts & promo codes (optional)

- Promo codes or information about which guest groups they should target
- We'll help you define discounts that can be applied by AI

Additional services

- List of services (e.g., massages, breakfast, bike rentals)
- Prices, descriptions, and photos (if available)

Property regulations

- If you already have terms & conditions, send them to us
- If not, we can provide a ready-to-use template

Email and payment setup

- Email address used for sending booking confirmations
- Payment gateway details (if you don't have one yet, we'll recommend trusted providers)

Full support during onboarding

We won't leave you alone with a new system.

We complete the onboarding process only when everything is clear and ready to go:

- ✓ We verify that the booking engine works correctly on your website
- ✓ We walk you through how AI Booking Engine works in practice
- ✓ We provide you with a detailed user guide

Increase your revenue with AI Booking Engine
